

# **AASHTO Subcommittee on Construction**

## **Roadways and Structures**

### **2012/2013 Work Plan**

1. Survey states and develop a summary of IRI specifications and composite index ratings for pavements. This information can be used to develop national performance standards.
2. Identify inspection methods for prefabricated bridge elements.
3. Develop construction guide specifications for drainage pipe inspection.
4. Investigate regional standards for certification of inspectors.
5. Develop a recommendation for AASHTO on limiting Buy America to major items of Roadways and Structures. Eliminate measurements of minor components which make up a single item.
6. Identify specifications and best practices for risk based inspection.
7. Support the process of piloting SHRP 2 products on DOT projects.
8. Establish criteria for when to utilize positive barrier.
