Meeting Agenda
Pittsburgh Marriott City Center
August 12–16, 2018
PERFECT HARMONY.

eTac. BOND COAT

Without harmony, there is discord.

That’s why agencies look to eTac to provide strong cohesion between asphalt layers. It creates a lasting, no-slip bond with minimal tracking, achieving harmony both before and after construction.

That’s music to everyone’s ears.
AASHTO and the Committee on Construction would like to Thank all of our Sponsors!
